REASON FOR TODAY'S CALL:  
Toilet running

DESCRIPTION OF WORK PERFORMED:  
The toilet flushvalve assembly was cracked, which would cause the toilet to slowly run. Condensation from the outside fo the tank was collecting on the floor. I removed the toilet tank, replaced the flushvalve assembly and reinstalled with a new tank to bowl gasket, tank bolts, and supply line. I also replaced the fillvalve(replaced a year ago) because the tenant mentioned it would get stuck on some occasions. I did not charge for this because it shouldn't be failing so soon after install.)
