**REASON FOR TODAY'S CALL:**

when the tap in the kitchen sink is turned on there is a leak underneath. it seems that the water is dripping very slowly from above and travelling down one of the lines/hoses? and pooling on the bottom inside the cabinet. there's not much water have got a small jug there to catch drips.

**DESCRIPTION OF WORK PERFORMED:**

The shut off valves under the sink weren't fully shutting the water off. I first repaired these valves by replacing the washers, stems, packing, packing nuts, and handles. I then installed the new customer supplied kitchen faucet and tested.
