REASON FOR TODAY'S CALL:

1 issue - Garbage disposal isn't working. Its a Waste king gourmet model 111. When powered you sometimes hear a faint noise. Suspect a burned out motor 2 issue - the fridge needs to be connected to the water outlet behind it. The installers said a 'connection' needs to be added to the line from the fridge to the wall water source.

DESCRIPTION OF WORK PERFORMED:

-April17: I was able to free up the garburator and tested by filling and draining the sink multiple times while running the garburator. The fridge line is missing a 1/4" compression nut, ferrule, and tubing insert. -April20: I returned with the missing parts and connected the fridge water supply. During testing we noticed the ice maker within the freezer had been removed. I turned the water supply to the fridge off.
