REASON FOR TODAY'S CALL:  
 The bathroom sink valve is leaking and needs to be replaced

DESCRIPTION OF WORK PERFORMED:  
 -I repaired the Hot & Cold shut off valves under the bathroom sink by replacing the washers, stems, packing, packing nuts, and handles. During testing I noticed the sink was draining slowly. I removed a bunch of gunk from the top of the drain and tested by filling and draining the sink multiple times. -While onsite it was mentioned that the garburator wasn't working. I was able to free it up and tested by filling and draining the sink while running the garburator.
