REASON FOR TODAY'S CALL:

The sink drain pipe is leaking. It looks like the threads are stripped where the pipe attaches to the sink. It will not tighten and water dripping.

DESCRIPTION OF WORK PERFORMED:

The left tailpiece nut was stripped and the ptrap threads were cracked. The drainage was also run in such a way that an 'S' trap was created. I repiped the ABS drainage under the sink and tested by filling and draining both sides of the sink multiple times.
